AUTO-FILL
(With approved credit) **Auto-Fill** - Deliveries are scheduled by NW Ohio Propane in an effort to maintain uninterrupted propane service at your residence or business providing your account is current. IMPORTANT: Auto-Fill is just an estimate. It uses past history and outdoor temperatures in estimating your tank percentage. If you have heavy sporadic usage, or inconsistent usage, this will throw the estimate off. Therefore, we ask you to check your tank periodically and call or email us (auto-fill@nwohiopropane.com) with updated tank percentages if there are any changes and/or spikes in usage. We also request you keep us updated on the addition of propane appliances, or if an alternate heat source is being used.

WILL-CALL
Will-Call – Deliveries are initiated by you, the customer. You are required to give 5 business days' notice when the tank gauge reads approximately 30%. If an immediate delivery is needed, NW Ohio Propane will do its best to accommodate, however, extra charges will be assessed.

The following must be completed prior to a technician installing the propane tank:

- ◆ Mark the tank location with two stakes to show direction of tank.
- ◆ Indicate where the regulator should be placed on the building.
- ◆ The tank needs to be placed within 100 feet of the driveway.
- ◆ Tank Distances per NFPA Regulations:
 - 500 gallons or less – 10 feet away from any building or lot line.
 - 500 gallons or more – 25 feet away from any building or lot line.

NW Ohio Propane field personnel will make the final determination of tank placement. NW Ohio Propane services from the propane tank to the regulator on the building. All inside service work is the responsibility of a certified heating and plumbing contractor.
