

PRICING OPTIONS

Current Price

Current Price is the per-gallon price (excluding applicable sales tax) established daily based on market values.

- A delivery date must be agreed upon, and delivery must be accepted on that date. If a delivery is cancelled or changed, you may be subject to new pricing as Current Pricing may change at any time without notice.
- The minimum delivery allowed for Current Pricing is 250 gallons. If less than 250 gallons is delivered, an additional fee will be applied.

Pre-Buy

Pre-Buy pricing allows you to buy your winter supply of propane in advance for the winter season.

- A Pre-Buy price is set, and the total amount for your estimated gallons (including sales tax) is determined.
- This program requires a minimum of 500 gallons to be purchased and delivered between October 1 and April 30.
- Choice of Auto Fill or Will Call deliveries. Will-Call customers are still required to take delivery of 250 gallons minimum per delivery, or additional fees will apply.
- A new Pre-Buy Agreement will need to be signed each year.
- The agreement and payment deadline is September 30.
- Payments made into the pre-buy program are non-refundable.
- If there is a Pre-Buy balance after April 30, funds will be applied to future purchases at the current price on the day of delivery.
- When the balance of Pre-Buy Pricing is gone before April 30, purchases will be billed at the current price on the day of delivery.
- Auto-Fill customers will continue to receive deliveries as determined by our software system.

Price-Cap (with approved credit)

Price Cap Pricing allows you to lock in a price ceiling for your winter supply of propane.

- This pricing option is only available with an approved credit application.
- Customers who own their own tank, and wish to participate in the program, will be charged \$50 per winter season.
- A new Price-Cap Agreement must be signed and submitted each year.
- The signed agreement is due by September 30.
- This program requires a minimum amount of 500 gallons to be purchased throughout October 1- April 30.
- Will-Call customers are still required to take delivery of 250 gallons minimum per delivery, or additional fees will apply.
- Price-Cap payment is due within 15 days of delivery. Late payment will result in termination of the Price-Cap Agreement, and any additional gallons will be charged at the Current Price rate.
